

Issue Report

Site quality report for https://tk2webdemoishoej.tk2.dk/forside produced on June 20, 2022.

Overall Quality		13 pages with quality issues
Errors		8 pages with broken links or other errors
Accessibility		2 pages with accessibility problems
Compatibility		5 pages with browser specific issues
Search		0 pages with search engine issues
Standards		12 pages have W3C standards issues
Usability		11 pages with usability issues
Totals		85 URLs checked

Errors

This section shows site quality issues, including broken links and server mis-configurations.

Priority 1

1 issues on 8 pages

- This link is broken. The page could not be found on the target web server.

Fixing this depends on how the link became broken:

- The link has been mistyped and should be fixed
- The destination page has moved and the link should be updated
- The destination page no longer exists and the link should be removed
- A file has been accidentally deleted and should be replaced

Usability

This section shows general usability issues, indicating navigation problems for all users.

Priority 2

3 issues on 11 pages

- Avoid underlined text - people will click on it and think it's a broken link.

Use something other than underlining for highlighting text, because it looks like a link, and users become frustrated when the "link" does not work.

[Usability.gov 10:4](#)

<https://tk2webdemoishoej.tk2.dk/lib/kendo-ui/styles/kendo.common-nova.min.css> line 788 806 1089 1522 2119

- Omitting `img width` or `height` attributes makes the page layout jump about as images load.

This makes the page very hard to read or click while it's loading. Fix by adding width and height attributes to the `img` tag matching the image dimensions. In responsive layouts, specifying `width` and `height` prevents layout jumping because the browser can pre-calculate the final image size when CSS like this is used: `img { max-width: 100%; height: auto }`
